

## FIRE OFFICER DEGREE PROGRAM - FALL 2009

Edmonds Community College has adopted the Washington State Fire Service Education Association Fire Officer Degree Program for deliver to the fire service personnel. The degree's ultimate goal is to provide a higher education program that enables fire departments, in cooperation with Edmonds Community College, to develop technically competent fire officers. who are highly skilled in their craft. The majority of students in this program are professional firefighters who want to improve their general education and fire fighting command expertise. The information, training and education gained from this program will enhance your chance to advance in the fire fighting profession, as well as sharpen your current work skills. Optional IFSAC testing is arranged after appropriate courses. An additional fee is paid directly to the testing agency.

At Edmonds Community College, we make it easy for firefighters to earn an Associate of Applied Science-Transfer (AAS-T) degree. We combine online, weekend, and on-campus classes to give you more flexibility in arranging class schedules to fit your busy lives. We invite you to take the next step and get a two-year transfer degree!

Credit for what you already know which has been gained through previous training (especially by the National Fire Academy) may also be earned. Visit <http://priorlearning.edcc.edu>. Click on Academic Departments and then Fire Office Degree for information that is more specific. An annual schedule is posted on the website [FOD.edcc.edu](http://FOD.edcc.edu)

**Please visit the following site for login information and system requirements when taking the online or hybrid courses: <https://blackboard.edcc.edu>**
